FACT SHEET:
Day Hospital Program

Why Choose Blythedale?

Blythedale Children’s Hospital offers a specialty outpatient Day Hospital Program for children who are able to live at home, but still require a level of medical and/or rehabilitative care that cannot be met by their school or outpatient program. Children admitted to the Program receive daily medical supervision and nursing care, comprehensive rehabilitation services (including physical, occupational, speech and/or feeding therapy), and education through the Mt. Pleasant Blythedale Union Free School District (USFD). Preschoolers, from birth through age five, also receive services through the Early Childhood Center. In addition, the Hospital’s Early Intervention Program (EIP) is a public program that provides a variety of early intervention services to infants and toddlers with special needs from Westchester County.

Following an evaluation by an interdisciplinary team at Blythedale (in coordination with the child’s family and community physician), an individualized treatment plan is developed to address the child’s unique medical, therapeutic and psychological needs. In addition, every child is assigned a social worker to provide family support and case management. As necessary, ongoing emotional support and counseling is provided.

Referrals are made to Blythedale’s Day Hospital Program by hospitals, physicians/clinicians, social workers, schools, parents and home care agencies. Blythedale is well-known for its superior outcomes and the ability to help patients achieve their maximum potential and meet their treatment objectives.

- Board-certified pediatricians including full-time staff in rehabilitation medicine.
- Medical consultations by neurology, pulmonology and orthopaedics as needed.
- Experienced nursing staff.
- Largest hospital-based pediatric therapy department in New York State, with 70 full-time pediatric therapists (physical, occupational, respiratory, speech pathology and feeding).
- 24/7 pulmonary and respiratory support (18 full-time pediatric respiratory therapists).
- School programming at the Mt. Pleasant Blythedale UFSD, the Hospital’s on-site K-12 public school district, to facilitate continued education during recovery.
- The Mt. Pleasant Blythedale UFSD can accommodate 120 school-aged children and 24 preschoolers.
- Transportation is provided by the child’s home school district, by school bus or ambulette.
- Full-day program runs from 9:15 a.m. to 3:15 p.m.
- Six full-time registered pharmacists, including a board-certified clinical pharmacist, providing medication management and administration, in consultation with referring physician.
- Expertise in feeding via naso-gastric, gastrostomy, and jejunostomy tubes.
- Pain assessment and monitoring.
- Adaptive equipment clinic on-site, with specially trained seating and mobility specialists, and expertise in prosthetics and orthotics.
- Comprehensive discharge planning, coordinated by a social worker to assist with school placement and follow-up medical care, counseling services and ongoing community support.
